Dear Neighbor;

Approximately a little over a year ago we were plagued with a white substance falling from the atmosphere. When it first started it seemed to be a minor problem due to the fact it was not an every day occurrence and the deposits were of a small amount when it did occur. I feel however small the problem may have seemed at first, it has grown into a major one over the past few months.

There have been small white particles on my car, on my patio, clothes (when hung out to dry) even my vegetables in the garden, AND I DO NOT KNOW WHY WE HAVE TO CONTINUE TO BE HARASSED CONSTANTLY BY THIS SUBSTANCE.

If at any time you find such foreign matter on your premises, please help to correct the matter by calling your local POLICE DEPARTMENT AND / OR MR. ROBERT D. ROACHE, ENVIRONMENTAL CONTROL ENGINEER, AND REPORT THE SITUATION, ASK THEM TO SEND AN OFFICER OUT TO VERIFY YOUR FINDINGS.

If we all work together for a cleaner environment I am sure each of us will benefit from our efforts.

Thanking each of you for your concern, I remain:
